

Endless Way

Smokie

You never had the feeling that
You've been loved - ever sad
Look the ground beneath your feet
Had to cry and you got weak

You run away tell me why
Just what for - tryin' to hide
The voices that you could hear
Gave you doubt a lof of fear

Baby it isn't easy to go your way
Tumbling through the darkness
Longing of the day

Wherever you reach in the end
Sometimes you need a helping hand
This is my call have no fear at all
On your endless way

You'll see the sky out from grey
No more run and hide away
Don't lose sight for the right
Till you see the shining light

I don't mind don't get me wrong
There's a kind of frost among
Live it up day by day
To give it you - and that's now way

Baby it isn't easy to go your way
Tumbling through the darkness
Longing for the day

Baby it isn't easy to go your way
Tumbling through the darkness and
Longing for the day
