

Friends Will Be Friends

Smokie

It's been twenty years today and they went by so fast
many strange mistakes were made but who's living in the
past?

there were times when everything just fell apart
We had the fire blazing round our heads and hearts

Friends will be friends
Friends will be friends
We're back to where we started with a heart and soul

I don't know where you have been but I kept you here with
me
buried in a rubbish bin or drowned in misery
Yeah there were times when all we had was faith
then we got lost and we got crazy and made mistakes

Friends will be friends
Friends will be friends
We're back to where we started with a heart and soul

Friends will be friends
Friends will be friends
We're back to where we started with a heart and soul
It's been twenty years today and they went by so fast

Friends will be friends.....
