

Never Made In Heaven

Smokie

Where you going when the party's over
And the lights are going dim?
Will you be with the one you love
Or will you be with him?
I can't hold on any longer
To a fading memory
I can't fight any stronger
Do you wanna make a fool of me?
Hot nights can be full of power
Turns your head to another world
City lights with a neon burning
Change you into another girl
I don't wanna lose this magic feeling
To a night that's lost control
Give a thought to what you're meaning
Get a grip, don't lose your soul

This night was never made in heaven
This night was never meant to be
How could I know you had a reason to go
Ohhhh

Bright lights in a flashing moment
Blue eyes stare across the floor
Do you wanna leave this boy behind?
If you do then there's the door
I don't wanna lose this magic feeling
To a guy that lost control
Give a thought to what you're leaving
Don't make me feel so cold

This night was never made in heaven
This night was never meant to be
How could I know you had a reason to go
Ohhhh
