

Over You

Smokie

It was a cold night
January light by a silver moon
And the band played
another serenade to lovers tune
But your crying eyes never could disguise
What was on your mind
And through it all I never would have called
You the hurting kind

Then you closed your eyes said goodbye
And turned and walked away

Baby don't you know it's true
There's nothing more that I can do
Even though I know we've through
I just can't get over you

Like the last time you said that you were
Mine and you'll never go
Those were good days thought you'll figured
Out a way I would never know
I was crazy to let myself believe I was the only one
I was so blind should have seen the sign of all the
Things to come

Baby don't you know it's true
There's nothing more that I can do
Even though I know we've through
I just can't get over you

I can't get over you and leave it all behind me
Every face I see every place I go reminds me

Now I realise you told me lies I'm looking for
Reasons I just don't know why
Should 've known better should've been strong
God knows I've got to find the strength to carry on

So just close your eyes and say goodbye
Turn and walk away

Baby don't you know it's true
There's nothing more that I can do
Even though I know we've through
I just can't get over you
