

## Breed

### Snake River Conspiracy

Spoken like a souvenir  
Touch all of your childhood fears  
Keep them at a gentle pace  
Closer now to feel their heat

Somebody says, I love you  
All those years you never knew  
All the things that I could do  
I keep them in a hidden place  
So I can rub them in your face

Somebody says, Somebody Says, Somebody says  
I made you (I made you, I made you)

Breed! Breed on your own!  
You're always alone  
You suffering clone

Maybe you're not good enough  
Good enough to make me blush  
So many reasons I can find  
To kill this little clone of mine  
I hold your grace  
Like a broken vase  
You've been replaced  
'Cause I made you

Somebody says, Somebody says  
Breed! Breed on your own  
You're always alone  
You suffering clone  
(I made you)

Breed, breed on your own  
You're always alone  
You suffering clone  
Somebody says, I love you  
Somebody says, I love you
