## **Smoke The Weed**

**Snoop Lion** 

(Hook) Smoke the weed, everyday Don't smoke the seeds, no way Smoke the weed, Smoke the weed

(Verse)
Sugar generation
Young boys and girls
Be careful of the seeds you show
If you wanna see a strong tree grow
You gotta put them for the future
Show respect don't neglect mother nature
All the pollution in this world
Me just can't stand it
Global warming make the whole world panic
Take care of mother earth 'cause she be the planet
Youth man don't go astray

Fresh trees, young seeds all tryin to find the light Stretchin out their limbs to the sun, got them right Help them keep their life will trap Watch out for life like satellite Them winds will stop and go like a traffic light Many obstacles to overcome in the city life Making sure they stay pure, teach you wrong from right See brings more spore new line
