

# All In Your Mind

Snowgoons

The brain controls every human action, voluntary or involuntary. Every breath, every heartbeat, every emotion. If the soul exists, it exists in the brain.

As a lyricist I flip scripts way on some different shit  
And spit to pick at your brain like The Mentalist  
Though some bump their gums like a tattletale  
I'm top gun, number one like an alpha male  
Nightingale fly in the pole position  
So sick niggas forfeit of their own volition  
While I chief on organic plants  
To keep my brain performance enhanced  
Plus my third eye wide, can't override my hard drive  
No jive, I pass you by to the far side  
Cause encounters of unusual rhymes  
Off the powers of a beautiful mind  
And it's a shame some lames can't manage  
How the ways of the game can make you brain-damaged  
But what you seek you shall find  
If you just peek inside, use the eye in your mind

Yo, it's all in your mind so go hard in your grind  
Like your soul's on the line  
Time is the inner mind's eye  
If you just keep it wide you can see through the lies  
Cause it's all in your mind  
To survive in hard times you can't stall on your grind  
You never know what you'll find  
If you open your mind cause it's all in your mind  
It's all in your mind, it's all in your mind, it's all in your mind  
Is it all in your mind?

Hey yo they listen through the fiber optics  
Don't try your options, provide the doctrine  
And eyes is watching illegal connections  
The eagle's nest is the people's death  
In the center of the beast with wings, receive the message  
Police investing, crime profit the deepest essence  
But my mind acknowledges nervous habits as secrets present  
Stay wary, bring war on the god, turn to Ares  
Thinking prepares me, no talking from where you squares be  
The nature of the beast is beyond what you can think  
It's instinct that make the pope turn your chest to miss me  
Simply I do cause I gotta, not cause I oughta  
The ghetto saga, raised with no father?,  
I move proper, psyched out bitches is head doctors  
Crazy bitch dropped a few bugs in my apartment  
Got love for mary jane like Peter Parker with?  
Got music in my veins, you hear the bass when my heart pump

Through my mind's eye saw a long time pass by  
Move with a cold shoulder, arm pointed all times  
Feet in the fire while the beast behind  
So I stick and move like Ali in his prime  
It's just my will to survive  
Primal instinct, my DNA ties, strong minds  
Long lives we live, some cursed, some doing a bid

Locked in a box where the animals live  
Burning the piff while I roll with the cannibal kids  
Some Hannibal shit, live a life on the whim out on a limb  
Nice with hands, nice with the gun, nice with the pen  
Mentally prepared for the win  
Black hoodies, black shirt, black Timbs  
Black burner, black ski mask and accidents  
Black trash bags and packages  
It's all mathematics, you living life backwards

Lhus is gifted, I keep my feet planted when I'm lifted  
Get levitated with force before my target but missed it  
Stay spliffted, I roll the dice with antichrist  
Communicating through mics with families in afterlife  
I seen the poltergeist, it arose through smoke and lights  
Broke the ice with visions of armageddon, the return of Christ  
I see burning ice and the loss of Earth's gravity  
Insanity, slipping away but something was grabbing me  
The hands of space, I was chosen to procreate  
By an alien race ten million light years away  
What a beautiful thing, so great that I couldn't see  
Billions of people on earth but they chose me  
Slowly my brain took on this incredible thought  
Looked down upon Earth as it was falling apart  
I blacked out from the image and when I opened my eyes  
To my surprise I realised you're living life just to die  
You still wonder why
