## Social Code

I have seen enough and I knew what I wanted  
I knew what I want, yeah  
I knew what I want, yeah  
I knew I couldn't have it all

Stumbling in the dark I knew you were watching  
You knew what I want, yeah  
You know what I want, yeah  
You knew with no lights at all  
You knew with no lights at all

Never losing faith in you, I'm  
I'm falling over and over  
I'm falling over and over  
Never losing faith in you  
I see you turn completely

Animals abroad your defense shatters  
Nothing else matters  
Nothing else matters  
Ready launch take it off

Struck oil I feel rich, internal combustion  
I knew what I want yeah,  
I knew what I want yeah,  
I knew it all along  
I knew it all along

Never losing faith in you, I'm  
I'm falling over and over  
I'm falling over and over  
Never losing faith in you  
I see you turn completely

Still so glad to be alive  
Still so glad to be alive  
Still so glad to be alive  
Ripples  
Ripples  
Ripples

Ah, ah, ah

Never losing faith in you, I'm  
I'm falling over and over  
I'm falling over and over  
Never losing faith in you  
I see you turn completely

Never losing faith in you, I'm  
I'm falling over and over  
I'm falling over and over  
Never losing faith in you  
I see you turnin' to reach me
