California (Hustle and Flow)

Social Distortion

Running around like you're front page news Lonely eyes and your motorcycle boots Tattooed heart and your jet-black hair Running 'round like you don't care

Take me down
Take me on down the line

Well, I was born, babe, with nothing to lose But the black man taught me how to sing the blues Made a little life outta rock 'n' roll And that crazy California hustle and flow

Take me down

Take me on down the line

Shake me down

Shake me on down the line

I went too fast with that rhythm and booze Almost ended up dead like all those other fools Everyone's got some sort of ball and chain What's life without a little pain?

Take me down

Take me on down the line

Shake me down

Shake me on down the line

Living in a Hollywood movie dream And I'm still reaching for the stars Life gets hard and then it gets good Like I always knew it would

Running around like you're front page news Lonely eyes and your motorcycle boots Tattooed heart and your jet-black hair Running 'round like you don't care

Take me down

Take me on down the line

Shake me down

Shake me on down the line
