

My life is complicated
I tried but it's too late an
Just when i think that it's ok
This place has overtaken

More and more than I'm here
It's all fake, I can't tell
I think i finally understand
How i got this way

Every day I think that I'm Jaded
More than I can admit
In every way I think that I'm jaded

To all that I have hated
I can't begin to state that
In every way that I think
My brain's activated

More and more than I'm here
It's all fake, I can't tell
I think i finally understand
How i got this way

Every day I think that I'm Jaded
More than I can admit
In every way I think that I'm jaded

There is no way that I can turn back
I see all things and it's crystal clear
Living here is war on my life
It has changed every piece of me

Every day I think that I'm Jaded
More than I can admit
In every way I think that I'm jaded
