Pick Me Up

One thing looking over my shoulder Is the thought that it won't last I got to give it this, it's moving fast Better make a mark before it all pass

Whoever thought that they had doubts had better think again You cannot begin to understand aal the things I am That's for sure If my world falls to pieces, will you still be there to pick me up?

I got respect for the people who listen To the people who understand The way I am and the way I act This is my, there's no changing that

Whoever thought that they had doubts had better think again You cannot begin to understand aal the things I am That's for sure If my world falls to pieces, will you still be there to pick me up?

Pick up the pieces of me Pick up a piece

If my world falls to pieces, will you still be there to pick me up?
