

# The Bringer

Soilwork

Hey soil mates, we're facin' the end  
We're down low, no use to pretend  
A bitter message from Heaven sent  
It says we're asleep at the wheel again  
Let's say we're stuck in an illusion  
Let's say we're out of control  
Possessed by a lethal redeemer  
Forcin' us to play a neurotic role

Oh, won't you take this thing out of me  
It never leaves me alone  
Fight the demons and devastate  
This mental battle zone

Bring it back, bring it home  
Enough is enough, I'm alone  
Everything's set all ready to go away  
Bring it back, bring it home  
To the place, I used to know  
There comes a time  
When this nightmare will turn to hate

Beware what you intend to say  
Those words will always make you pay  
Repress what's before your eyes  
Gather the spirits and hypnotize  
Let's say we're stuck in an illusion  
Let's say we're out of control  
Possessed by a lethal redeemer  
Forcin' us to play a neurotic role

Oh, won't you take this thing out of me  
It never leaves me alone  
Fight the demons and devastate  
This mental battle zone  
I wait for this to overcome  
What's inside it needs to be done  
This vital plague has brought my pain  
And endless pain

Bring it back, bring it home  
Enough is enough, I'm alone  
Everything's set all ready to go away  
Bring it back, bring it home  
To the place, I used to know  
There comes a time  
When this nightmare will turn to hate

Bring it back, bring it home  
Enough is enough, I'm alone  
Everything's set all ready to go away  
Bring it back, bring it home  
To the place, I used to know  
There comes a time  
When this nightmare will turn to hate

Oh, won't you take this thing out of me

It never leaves me alone  
Fight the demons and devastate  
This mental battle zone  
I wait for this to overcome  
What's inside it needs to be done  
This vital plague has brought my pain  
And endless pain
