I Just Want To Make It New With You

You will discover me through my songs Learn my heartbreaks and fears and depression Hear all the cracks and the lack of talent And I hope that you don't hate me by then I know that it's true I know you feel it too Together we will learn To make everything new

I only wanna share new things New stories and new kisses I don't wanna do over what I failed at before I just wanna make it new with you Teach me how to be yours Teach me all that is you What is past is past What is new will last

And you will start to think I'm boring Coz I'm straight edge since I'm 18 But I will write you songs just to prove you that I love you And I hope that you don't hate me by then Coz I just wanna make it new with you
