

Colour Of Your Dream

Solid Base

When I look into the crystal
It never tells me what to do
I've been looking for a special
A special love to set high heart free

I see the color of your dream tonight
When I look into your eyes
See the color of your dream tonight
When you're here right by my side
See the color of your dream like every day
See the color of your dream fight far away
See the color of your dream like never before
See the color of our dream. I never let go

When I look into the mirror
I endeavor where are you
I've been looking for a special
A special love to set high heart free
