

# I Wanna Love You

Solid Harmonie

In my heart I know that you are mine  
But my mind keeps changing all the time  
It's so hard to find security  
To bring love into our destiny

I know that you wouldn't tell me if I'm out of line  
I hear the senses telling me I've been running blind

I wanna love you  
And hold you through the night  
I wanna love you  
Make sure that you'll be alright  
I wanna love you  
And hold you through the night  
I wanna love you  
But nothing's coming out right

When I'm close to you I'm in too deep  
But without you I can't even sleep  
I would give up almost anything  
To feel love and all the joy it brings

I know that you're trying hard to say what I can't find  
Oh how I understand your pain  
You've been left behind

I know that if you can help me open up the door  
Oh I could love you once again and forevermore

I would love you once again  
Take care of you and then  
Make sure that you will never be lonely
