## **Underground Dream**

Had a thought that consumed a good for bad I can reckon I can never beat the wheel There's a white tap stealing a nightmare Shadows laughing and making deals

Let your hair hang down for this moment And they try to make it disappear If you take away this underground dream

Guns are education The answer's larger than the Hollywood sign If your souls can see the writing On the burning wall of eternity The bastion's a penitentiary Reaction will pull broken hearts through

We can't take away this underground dream We can't take away this underground dream We can't take away this underground dream We can't take away this underground dream
