

# Take One Breath

Sonata Arctica

New human has seen the dawn of day  
Overcame the limitations  
Of evolution by learning to apply  
S-C-I in fi, you cry silence !  
Science is blasphemy !

My brainchild, intermingle,  
Come foretoken of trans-human  
Already supersedes men like you and me  
Transcending the old human ... silence !  
Sci-blasphemy ! Silent blasphemy  
Sci-fi human, sci-fi human  
Has arrived

Once upon a dream,  
I was to fall deep in a goldmine  
I had a world within my reach  
I had to choose between my life  
And something I can't even see

Standing at the gates of the evolutionary endpoint  
Reaching for the key we cannot yet see  
High above the all-seeing eye of this reality

The lines we learn to fear  
Drawn safely in the distance  
Slowly we become the new species of tomorrow  
Mankind lives or dies by its boundless dream

Once upon the future  
We're gonna blame our evolution  
For the lack of light far behind the sun  
As we try to rise on our self made burning wings

Take one breath, just take ...  
One breath away, the future, today

Take one breath, one breath ...  
Slip away from the dream, you're awake

Take one breath  
One last breath,  
Prophecy, sci-fi, pigs that fly

Take one breath  
One last breath,  
Not faraway,  
Pre-order your future today
