

Domino

Sondre Lerche

South of the border in view of another
Somebody's watching the gates with a lover boy
Tried teleporting and tried ammunition
Turns out somebody else screwed up the mission

Don't come closer domino, domino, domino
One step closer and everything collapses oh
Like domino

You weren't always a clean bill of health
Tried to convince me and then convinced yourself
Started sporadically, now it's tradition
To find yourself south of the border, and in your condition
Thought I tried to explain
But it doesn't make a lot of sense if you can't name names
When I lowered my voice
You were dozing off and drifting further off the coast

Don't come closer domino, domino, domino
One step closer and everything collapses oh
Like domino

Don't come closer domino, domino, domino
One step closer and everything collapses oh
Like domino

Don't come closer domino, domino, domino
One step closer and everything collapses oh
Like domino
