

Let me tell you every thought that I've come to  
When I think of all the things that you do  
I can't see if you're the only one - it's hard to say  
And I think it's all the same to me today

I can see you too  
If I can just see you this one time  
I sit alone  
Everyone's at home  
I see it  
I believe  
Somehow I know it's true  
Your genetic kiss to me  
I live inside of you

I have heard it said before it'll never happen  
Had it drilled in since a kid it makes my head spin  
I'm still looking for these thing that I can't find  
Thought just come and go swirling through my mind

I see me and you  
Then it's him I'm thinking of  
We sit alone  
No one else at home  
I taste it  
I feel  
And now I know it's true  
Your genetic kiss reveals  
I'll always be with you

Hey baby, it's you I'm thinking of  
Hey baby, who do you love  
Don't worry baby, I'm watching them as you sleep  
Let me whisper, some things for you to keep

There's no perfect idea  
There's no perfect fate  
Just little stabs of happiness  
Sometimes a little too late  
So keep your eyes wide open  
And know what you're made of  
Remember first thought best thought  
Try to stay in love
