

Everytime I look in my life I think of you
Everytime I look at you I wonder what to do

So let's go, go away, go
Let's go, I don't wanna stay any longer

God knows that you're my brother
Got a funny idea there is no other
You know we have to make it really last
Have to make it happen really fast

Let's go, go away, go
Let's go, I don't wanna stay any longer

If we could just know where we come from
Maybe we could figure out something to do
All I know now is we're together
And something tells me we might live forever

So let's go, go away, go
Let's go, I don't wanna stay any longer

Everytime I look at you I wonder what to do
Everytime I look at you I wonder what to do
Everytime I look at you I wonder what to do
Everytime I look at you I wonder what to do
Everytime I look at you I wonder what to do
Everytime I look at you I wonder what to do
Everytime I look at you I wonder what to do
Everytime I look at you I wonder what to do
Everytime I look at you I wonder what to do
Everytime I look at you I wonder what to do
