

The Night Is Ours

Sonohra

If you promised you'll stay here forever
you could count on me to always be yours
and on each passing day we could still feel the same
'cause our love is meant to be

There's a strong light shining from your eyes
it is so bright that i can hardly see
it reflects all the things that you hide in your soul
things that make you truly free

R : There's a reason if we're here tonight
there's a reason to stay up all night
we don't need anywhere to go
'cause the nights all ours and bright tonight
and realize there's nothing to fear now
just as long as i know that you're here
as you walked through my door it was clear you were true
your are breath inside of me

R : There's a reason if we're here tonight
there's the reason to stay up all night
please don't let the lights go out
turn our whispers to a scream
come a little closer now
the night is ours
i never wanna say goodbye
stay a little longer babe
hold yourself up to the night
the night is ours tonight
you now, i'll never let go

R : There's a reason if we're here tonight
there's a reason to stay up all night
we don't need anyplace to go
'cause the night is bright and ours tonight
stay a little longer tonight
'cause the night is ours
