

Off & On

Sophie Ellis-Bextor

Though I can't get out
Trapped inside of it
I won't let go
Pain keeps driving it

I only hope and pray
That I can make it pay
Keep pushing, it
I keep pushing on

I did the best I could
I learned to sacrifice
I tried to make it work
This time away has done me good
It's a change, from you

Keep switching me
Off and on and off and on and on
(I put myself back together)
You've been gone too long, the only love is gone
You thought I'd be free forever
Keep switching me
Off and on and off and on and on
(I put myself back together)
You've been gone too long, the only love is gone
You thought I'd be free forever

No I can't turn back,
I'm sick and tired of it
When love broke down
I rewired it

I'm only human babe
You let the feeling fade
Keep pushing
Till I reach a higher ground

I tried to make it back
When every door was closed
Your love was all I had
I tried to make an honest man
Woo ooh
Out of you

Wired to the sun with a laser beam
Power surge, come feel the energy
And I'm ready to shine and shine and shine and shine....

Keep switching me
Off and on and off and on and on
(I put myself back together)
You've been gone too long, the only love is gone
(You thought I'd be free forever)
Keep switching me
Off and on and off and on and on
(I put myself back together)
You've been gone too long, the only love is gone

(You thought I'd be free forever)

I put myself, I, I put myself, I put myself back together

You thought I'd be, you, you, you thought I'd be free forever

I put myself, put, put, myself back together

You thought I'd be, you, you, you thought I'd be free forever
