## **How It Feels**

## Sophie Zelmani

We are getting there darling This is you and me Have you thought about it darling Have you thought about how it feels

I think we've got some answers Just looking at you now This is not what happens When a love is about to die

The rumour you're hearing Is coming straight from me It's a rumour to rely on This is how it feels

We're in the middle of it darling It just occurred to me I haven't thought about it darling How it really feels

The rumour you're hearing Is coming straight from me It's a rumour to rely on This is how it feels
