

It Knows

Sophie Zelmani

I know where, it revives
It plays so dead
But I know
Where it goes wild

Just let it be, it's still inside
Pretends it's asleep
But I know
Where it'd break out

Yes I know where to go
To make it show
But I took it there
Far too many times
That's what it knows
It knows, it knows

I know where
It get back its time
It feels so old
But I know where
It'd get young

Just let it be
Don't need to feel it now
Plays hide and seek
But I know it's just the child

Yes I know where to go
To make it show
But I took it there
Far too many times
That's what it knows
It knows, it knows
