

# Shades

Sophie Zelmani

What was that Did you wanna steel a kiss Where were you When you brought me in to this

In a shade There's a loss of light But that's what we got And I know it can hurt To do things right

Shade

You got You got me so frail And frail I'll leave

Our face To a stronger day My recall To many things It will always hurt But that's a common thing

In the shades In the shades

Does it matter What I can understand It will always be you Who let go of that hand

I am sad Over things you say Your words Will always hurt me On our way

Shades Shades

Worries For where you belong Gets me in trouble When you've got your hallow on

Let those nights Be only yours Remember hurt Remember sore

In the shades In the shades
