

Chance

Sorry Boys

Your secret thoughts you hide from me
Don't let me be confused
I need your love and we both know
That all we need is here

Give me a chance
Give me a chance
Like no one did before
Like no one did before

Your secret thoughts you hide from me
Don't let me be confused
I need your love and we both know
That all we need is here

Give me a chance
Give me a chance
Like no one did before
Like no one did before

I'm silent
I'm silent
Like no one was before
Like no one was before
