

Black Star

Soul Asylum

There is a black star somewhere in the night
It's like a sunspot, a reminder of the light
Will you lead me now, don't let me down
Will you help me find my way
Black star
Black star
Black star
There is a black star
There is a cold drink coming my way
I never wanted much more anyway
In the darkest night can I pick you out
Will you help me find my way
Don't leave me now, leave me astray
Black star
Black star
Black star
There is back star
There is a black star somewhere in the night
