

Just Try

Soulsavers

You came to me with open arms
To take away my fears
I took you in and you stayed awhile
Live with me right here

You told me to believe in something
Something that's true
Like the mountains and the deep blue oceans
So much bigger than you

He said, just try
Come on, just try
Lord, just try
Just try, just try

I offered you a place to stay
Somewhere to rest your head
Lord knows, I need you here
There was something you said

You'll have to believe in something
Something bigger than you
Like the great wide open spaces
There's religions too

He said, just try
Come on, just try
Lord, just try
Just try, just try

It gave me more than I deserve
It gave me peace
It gave me everything I love in this world
And now I have to sleep
Just let me sleep
I have to sleep
