

# One Thing

Soulsavers

Ain't it something, when she walks into the room  
With a light that's almost way too much for me  
Ain't it something, when waves crash on the shore  
The ocean's wilder than before

It's a different world today  
No one seems to care much anyway  
Don't listen to what they say  
They don't know what they're fighting for  
And there's always life on Mars out there for me

You just need one thing  
Love

Ain't it something, when you stare up to the stars  
And you wonder how we could have come this far  
Don't say nothing, just lay down next to me  
We can watch those tasteless shows on our TV

It's a different world today  
No one seems to care much anyway  
Don't listen to what they say  
They don't know what they're fighting for

You just need one thing  
You just need one thing  
Love

There's always one thing, that takes me far away  
Then I don't hear a single word you say  
There's always something, that makes me want to stay  
There's really nothing more to say

You just need one thing  
Love

You just need one thing  
Love
