

Keep Close

South

Keep close but keep quiet
As if an angel graced us all up in our hands
Redefine close to tears
It looked painful like I secretly feared

What I mean to say is you talked me round
Don't look down on the luck you found

I mean well I steal
I see violence in the corner of your eye
Make sense of what you feel
There's a danger in every story and every smile

What I mean to say is you talked me round
Don't look down on the luck you found
What I mean to say is you tore me down
But don't look down on the luck you found
