

Recovered Now

South

Her last movement every moment she glides
When the life you love yeah, falls for the final time
The more you give and take
The more these things take shape
Let the light of morning break see it shine

Do you find you've recovered now
Do you find you've recovered now
Do you find you've recovered now

I've seen this fever build when conversation runs dry
When all the trouble that you owe, makes you one of a
kind
The more you build then break
The more time it'll take yeah
Put the lives you love at stake it's your only crime

Do you find you've recovered now
Do you find you've recovered now
Do you find you've recovered now

Do you find you've recovered now
Do you find you've recovered now
Do you find you've recovered now

Do you find you've recovered now
