

# All I Want Is Everything

Southside Johnny & The Asbury Jukes

There is a drug on the market  
They claim will satisfy  
But I tried them already  
And they just don't gratify

There ain't no drug ever made  
Ever gonna pacify me  
'Cause all I want is everything  
All I want is everything  
All I want is everything, everything

Forty-second street has so many devices  
But very little I haven't tried  
Newspapers drool at a mouthful of vices  
Headlined in the classifieds

They say there's a limit to endurance  
I know that I haven't reached mine  
All I want is everything  
All I want is everything

And I know that it's just my obsession  
Makes me scurry like a rat in a maze  
And I know it's becoming an addiction  
I Need it now, right now, right now

Strong arm tactics have come into fashion  
The muscle boys are back in style  
They shatter the bones of descension  
And never crack a smile

Well, if that's the way breaks are gotten  
You know I'm gonna give it a try

All I want is everything  
All I want is everything  
All I want is everything  
All I want, all I want, all I want is everything  
Just give me everything  
I don't want much, I just want it all, want it all  
Everything, everything, everything, everything
