

# I Remember Last Night

Southside Johnny & The Asbury Jukes

Well all week long I've been working so hard  
Working at my job  
My body's been aching from the hours on the line  
Struggling at my job  
And when the day ends and I get off  
I feel so weak and I feel so tired, so tired  
But when I get home I'm gonna change my clothes  
I'm gonna go out tonight  
Just like I did it last night  
Oh, I remember last night

The door flew open  
The nightclub air hit my face  
My heart went racin'  
When the wild night heat took my breath away  
And it was cold outside  
But the place was on fire

Someday I live with a fire in my heart  
Like a sickness came over me  
Sometimes I feel so empty inside  
From the day to day monotony  
And in the morning when I get up  
I feel so weak, so so uninspired  
But when the sun goes down  
There's a magic in the mood  
There's a promise in the air at night  
I know it's gonna be alright  
Just like it was last night

When the door flew open  
The nightclub air hit my face  
My heart went racin'  
When the wild night heat took my breath away  
And it was cold outside  
But the place, the place was on fire  
I could feel the fire

But if this fire's ever cool  
On these weekend nights  
I'm gonna have to fan the flames  
I got to keep the night alive  
It's the only way I can survive

The door flew open  
The nightclub air hit my face  
My heart went racin'  
When the wild night heat took my breath away  
And it was cold outside  
But the place was on fire  
The place was on fire  
I could feel the fire
