

# Supersonic Jetplane

## Space

There she goes she's high above the stars  
I could never, ever reach that far  
My inhibitions, cause palpatations in my heart  
She's on a supersonic jetplane flight to Mars  
Up above the heavens she ascends  
Reading cosmicomics to her friends  
You know I try to find her  
And cut the ties that bind her to her fate  
And I hope I'm not too late

Through all this time and space this Universe  
Alone I'll face  
Just trying to find her  
Through all the years and moments still ahead  
Until my body's dead  
I'm trying to find her  
There she goes she's high above the stars  
(A supersonic jetplane flight to Mars)  
I could never, ever reach that far  
(A supersonic jetplane flight to Mars)

There she goes she's high above the stars  
(A supersonic jetplane flight to Mars)  
I could never, ever reach that far  
(A supersonic jetplane flight to Mars)  
There she goes she's high above the stars  
I could never, ever reach that far
