

And It Is

Spacehog

(Royston Langdon)

I wasn't perfect in the pastor's eyes
You say you love me and I don't ask why
Cause now I know
Now I know

Two fools in love
Just in love with love
The sky is wide and the stars are up
And now I know, now I know

(Chorus)

And it is, and it is
It's all wrapped up in you and I
And it is, yes it is
The universe is here tonight

I love the back up that she brings me
I love the cheap songs that she sings
That's why I know
Now I know

Playing with hearts in the field of love
We're going down to the river of love
It's why I know
Now I know

(Chorus)

Dreaming of shallow life away from me
All my life
Seems that the truth is hard to find these days
I'll survive

Cause it is, yes it is
It's all wrapped up in you and I
And it is, yes it is,
The universe is here tonight

(Chorus)

And it is, and it is, and it is
