

Perpetual Drag

Spacehog

(Royston Langdon)

It's 5am again
Crystals crack in the pouring rain
But I just can't explain all these perpetual drags
The perpetual drags, the perpetual drags
(Chorus)

Could we fall in love
Do you think we should
Maybe we should have
Perpetual drags

Days go by the same
I'm by your side but you're miles away
That's why I can't explain
All these perpetual drags

Why did we fall in love
Why did you think we should
Why do we have to have
Such a perpetual drag

That sugar and spice should have made everything nice
But all my days were lonely there with you

(Chorus) x2
