It's All Over

It's all over now He knew from the start It was in the way She walked and the way she moved

It's all over now She told him somehow It was in the way She softly turned her head

It's all over now And now she's free Free to find another love

It's all over now And when she's alone She remembers her first love From so long ago

It's all over now How she thinks of him And of what it would be like If he were to call

It's all over now And now she's free Free to find another love
