

Hey you, tell me what you know
Hey you, tell me everything you know
Why the subjects move to a constant beat
Would the motion change with more heat
Do the subjects have appetites
Does this just occur on one site

It's educational

Hey you, tell me what you know
Hey you, tell me everything you know
Do the subjects seem to react to light
Do the males among them tend to fight
Does the blank look mask pain or fear
Does it bother them that we're here

It's educational

Hey you, tell me what you know
Hey you, tell me everything you know
Is it all a part of a mating rite
Why are some quite black and some quite white
Do they sleep by day and live by night
If you get too close, will they bite

It's educational

Do they ever stop or break down
Do they not look up or look down
Does it bother them that we're here
Although it's not completely clear

It's educational
