

## Girl in Your Eye

Spirit

She's the girl in your eye  
Sometimes you wish that you had passed her by  
Days come and they go  
And if you make it, you just don't know.

And then you think that the feeling is over  
And if you see it when you look on her face  
She will call you on back from your reasons  
With words from a far away place.

She's the girl in your eye  
The time has gone but you still want to try  
Someone stands by your door  
But you don't listen for that sound anymore.

And when you know that the feeling is over  
And then you see it when you look on her face  
She will call you on back from your reasons  
With words from a far away place.

She's the girl in your eye  
The time has gone but you still want to try  
Someone stands by your door  
But you don't listen for that sound anymore.

And when you know that the feeling is over  
And when you see it when you look on her face  
She will call you on back from your reasons  
With words from a far away place.
