

# What Happened To The First Time

Spiritfall

What happened to the first time  
You left me in a hole  
Your words are something that can hypnotize  
I'm thinking that I want you  
I want you to see through  
What happened to the first time  
That I wanted to be with you

So why do you always take a part of me  
Search yourself find what you're looking for  
Two can play and you're losing the game  
The time will come and I will leave you all alone

Now you start to crawl back  
Your digging deeper down  
You need to see the error of your ways  
My heart is not an object  
A thing you can beat down  
Your promise is a mirror  
That you break when I'm around

So why do you always take a part of me  
Search yourself find what you're looking for  
Two can play and you're losing the game  
The time will come and I will leave you all alone

Now you start to crawl back your digging deeper down  
Now you start to crawl back your digging deeper down  
Two can play at this game but I don't care anymore  
Two can play at this game but I don't care anymore

So why do you always take a part of me?  
Search yourself find what you're looking for  
Two can play and you're losing the game  
The time will come and I will leave you all alone  
Leave you all alone
