## **Spitalfield**

Hit that clock and step out of sleep It's a brand new day You've got someone to be and that someone is you (that someone is you) When you do something, you give it full heart You're right through the door with a running start When you fall asleep tonight and you ask the question: "Am I ready?" Yes, you're ready Would you pause the world for it? Would you drop your life now? "Am I ready?" Yes, you're ready If anyone can, I knew you could You make that brand new shirt and tie look good And I knew you would (I knew you could) Don't ever say you'll never live the life you dreamt you'd lead Lay me down
