I Loved The Way She Said L.A.

Spitalfield

Say the things you say And you're dreaming like you do You know sometimes circles run around you Hey now, let's be honest I really think it's true You know sometimes we all bend the rules

You run with life You've been around You love to live to hate this town And I hope and dream Just like you do Yeah we've been here twice before You want it to mean so much more And I hope that everything goes through

She goes to California Oh, California's not so far When I close my eyes and wonder where you are And you wish upon a star 2,000 miles doesn't seem so far

You play the games you play You win sometimes you lose You know sometimes walls run into you Now you've got me thinking And I really think it's true The sun shines sometimes just for you

You run with life You've been around You love to live to hate this town And I hope and dream Just like you do Yeah we've been here twice before You want it to mean so much more And I hope that everyhting goes through

She goes to California Oh, California's not so far When I close my eyes and wonder where you are And you wish upon a star 2,000 miles doesn't seem so far
