The Yearbook Song

Should i sign your yearbook now Bringing closure to this all From this pen shakes my hand And i raed what you said As it spins around my head And i hope you understand

Went until my head spins off again Wish i was seven years again Went until my head spins off again Wish i was seven years again

The time is right upon us now Until next time is not this fall And i hope things don't change And i read what you said As it spins around my head And i hope you understand

Went until my head spins off again Wish i was seven years again Went until my head spins off again Wish i was seven years again

I can't stand this half-baked ending I know that you're undertaken My heart breaks while your hearts' mending

Went until my head spins Went until my head spins Went until my head spins off again Wish that i was seven years again Went until my heads spin off again Wish i was seven years again

Went until my head spins (5x) Went until my head spins off again Wish i was seven years again
