

Small World

Split Enz

It's a small world, and you must agree
It's not a very big house, for a large family
People moving out or making home improvements
But the basic problem never seems to go away
It's a small world

It's common knowledge, satellite looks on
An a Russian man is sent to spy upon us
It's enough to make a man feel uncomfortable
someone else's leaders' needs kill Pacific atoll
It's a small world

Oh, well there's only just enough to go 'round
Wanna shout about it, shout about it
Small world, and it's getting smaller
There's no getting away from it all,
In a small world

Baby boom-town, and the population swells
There's a broken circuit, no one tells the truth
Are we mammals with a future in this nutshell
When you're small it should be easier to pick things up
It's a small world

Oh, wanna hold it in my hand
Gonna roll it like a ball
Oh, we're a drop in the ocean
Gonna shout about it, shout about it
Small world, and it's getting smaller
There's no getting away from it all in a small world
yes and it's a strange place for bringing up your children
When there's no guarantee that they'll have a future
In a small world
