

Not Soon Forgotten

Spoken

You were more than a conversation, more than a passing of the time

You will not soon be forgotten, or fade away in time

Every time I see your face
I see the future in your eyes
Every time I take a step
I am closer to surrender

Not soon forgotten I never will forget you
I'll never face the night alone
You're the reason my heart beats true
And it gets stronger with time

The story of your life has, and will stand through the tests
You will not soon be forgotten
Your love has changed my life
Not soon forgotten

Your story is
Not soon forgotten
You have changed my
Not soon forgotten

Your story is, not soon forgotten
You have changed my life
Every time I see your face
Every time I see your face
Every time I take a step
Every time I take a step, I see my future living in me
