

Shadow Over Me

Spoken

(Verse)

I remember falling
I remember hurting feeling away
Lost, wounded into shadows

(Verse)

I abandoned everything
Got away the darkness that have left me searching
In the shadows

Face to face , face to face with the shadows

(Chorus)

And now what's in the past it stays
See the ignorance and bites are still the same
But the fear will fall away
The fear of a shadow over me
And now the past will find it's way
To the words as we fall from grace
But the fear will fall away
The fear of my shadow over me

(Verse)

I never thought I'll be
Forced to remember how you left me searching
You left me hurting

(Verse)

Once I refused to see
All you've taken all you've stolen from me
You stolen from away

(Chorus)

And now what's in the past it stays
See the ignorance and bites are still the same
But the fear will fall away
The fear of a shadow over me
And now the past will find it's way
To the words as we fall from grace
But the fear will fall away
The fear of my shadow over me

(Bridge)

I will live my life so
There are rights on and
All believe the way
I will live my life so
There are rights on and
Let's hope the eyes are gray

(Chorus)

And now what's in the past it stays
See the ignorance and bites are still the same
But the fear will fall away
The fear of a shadow over me
And now the past will find it's way
To the words as we fall from grace

But the fear will fall away
The fear of my shadow over me
