

Stand Alone

Spoken

Rise, rise above the power chain
My name alone
Bargain and the fire appear
We're the patients and the crowd

I stand alone in the fire
I stand alone in the fire

I stand alone before the fire
A past that's been chasing me
And so I face the flame now
I'm screaming out
I beg You to hear my voice
But I stand alone

Screaming from the fire
Burning in the flames
Hope is my desire
Now turn Your face to me

I stand alone in the fire
I stand alone in the fire

I stand alone before the fire
A past that's been chasing me
And so I face the flame now
I'm screaming out
I beg You to hear my voice
But I stand alone

I am not alone
I am not alone
I am not alone
I am not alone

I stand alone before the fire
A past that's been chasing me
And so I face the flame now
I'm screaming out
I beg You to hear my voice
But I stand alone

Screaming from the fire
Burning in the flames
Hope is my desire
Now turn Your face to me
