

Planet Girls

Sponge

Space, light, sound and mind exactly what is real
Into a universe we fly we are her will
In my space suite out among the stars
I look and feel them on my radar

Planet girls
You make my satellites whirl
You shake up my world
Planet girls and satellite girls
You make up my world

With her gravity and smile all things seem so clear
In a trap set long ago so life freely spills
You seem to feel you know where they are
You think you see them on your radar

Planet girls
You make my satellites whirl
You shake up my world
Planet girls and satellite girls
You make up my world

In my space suite out among the stars
I look and feel them on my radar
I know where they are
I know where they are

Planet girls and satellite girls
You make up my world
Planet girls
You make my satellites whirl
You shake up my world

Shake up my world
Shake up my world
Shake up, shake up my world
