Inside Out

Time's gone inside out Time gets distorted with This intense gravity I don't got time for holy rollers Though they may wash my feet And I won't be their soldier

There's intense gravity in you (There's intense gravity in you) I'm just your satellite (I'm just your satellite)

Ooh, and I know that time's gone inside out And now it's only like I told you Mmm, though they may wash my feet They do not make me complete

Break out of character for me Time keeps on going when We got nothing else to give We got nothing else to give

Ooh, cause our time's gone inside out I don't make time for holy rollers Mmm, there's only you I need They do not make me complete

Spoon
