

Night Nurse

Squeeze

They're nothing down, I supposed to need a test
And now you told me that I need to rest
I ring the bell and she comes 'round again
This time I thought I had the words in my brain
She's had him caught me and I thought we'd conceive
I see the window through the gap in my feet
I'm looking forward to my business in France
They said I'm listening 'til the hour ends

I need a voodoo man, a voodoo man I need
I feel adrift now I'm on a good beat
And is this the way to jazzing my hair?
Shake your bathtub, the night nurse is here

I need a voodoo man, a voodoo man I need
I feel adrift now I'm on a good beat
And is this the way to jazzing my hair?
Shake your bathtub, the night nurse is here

I told the people on the side of the bed
My woman left me in a phone booth upstairs
I saw my photo on a bed tonight
I lost my marbles and committed a crime
And then they kissed me and I faded away
Into the voltage in my ear and to brain
I want a nappy and a bone in my face
Is it a better judge I can name?

I need a voodoo man, a voodoo man I need
I feel adrift now I'm on a good beat
And is this the way to jazzing my hair?
Shake your bathtub, the night nurse is here

I need a voodoo man, a voodoo man I need
I feel adrift now I'm on a good beat
And is this the way to jazzing my hair?
Shake your bathtub, the night nurse is here
